

UniTandem – Each One Teach One

UniTandem provides higher education students in Finland with a chance to learn languages and cultures through tandem learning.

Two students teach each other their mother tongues in one-to-one informal online meetings.

What is tandem learning?

Tandem is a method where two students teach each other their native (or native-like) languages in informal meetings, acting both in the teacher's and the learner's roles. Tandem can be utilized from beginner to advanced levels, and it can be used to support regular language studies or taken separately.

Step 1

[Sign up to UniTandem](#)

Visit <https://each1teach1.rd.tuni.fi/> and sign up with your university email. Add the languages you are interested in learning and teaching.

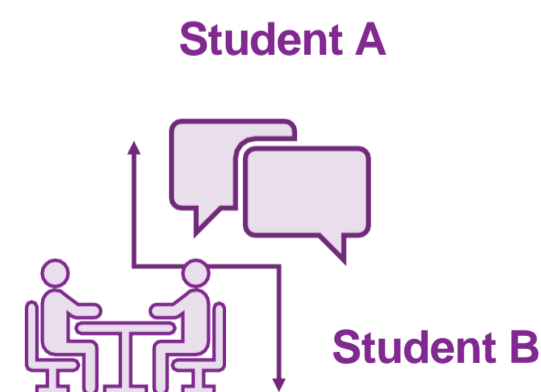

Step 2

Find a match from the <https://each1teach1.rd.tuni.fi/> Get acquainted with your UniTandem partner!

Step 3

When you have a match, enroll. Degree students of Finnish universities of applied sciences (AMK students) can enroll in this course through the Peppi/Pakki system of their home UAS (search for TAMK cross-studies). Students from Finnish universities can enroll using this form: <https://elomake.tuni.fi/lomakkeet/36534/omake.html>. Instructions on how to join the course area will be sent via email to the students who are approved for the course.

Step 4

Read the instructions and choose the topics or triggers that you find interesting. 3 triggers as a learner = 1 credit. You can study 1-5 credits.

Step 5

Reflect on your study process in the course blog, collect the outputs of each trigger you complete in your portfolio, and submit the portfolio when you're finished.

Step 6

Give your partner and yourself feedback at the end.

Step 7

The coordinating university will award the credits, and you will need to transfer them to your university if it is not a RIPA member.

Enrolment period: 2.12.2024-27.1.2025

Implantation period: 30.1.2025 30.5.2025
